

## I'm stuck as I can't give her a watch

---

Please can you give me a solution to this because my wife is upset with [replica watches uk](#) that doesn't even work. Please work with me to resolve this ASAP. Also can you please tell me why I was charged [fake rolex sale](#) on my debit card. Because I was supposed to be charged \$69.00 after 5% discount. I today received my [replica watches sale](#) however I just want to advise of two problems firstly when I received the watch as I unpacked it and tried it on my wrist, the clasp would not do up after having a [breitling replica](#) look I realised that it was because the clasp is actually twisted so the watch is no good as it can't be done up. Also only a small issue but in the picture of the original watch on your website underneath the 6 it says Swiss made like the real Rolex, however this was not on the [hublot replica](#) I received. I have chased this watch so much as its a present, for my daughter's birthday, now I'm stuck as I can't give her a watch that she is unable to wear because it won't do up.
