draw

Послан CapeSauppy - 15.10.2017 03:42

Allows multi item tags to be stored in non standard fields, for example Arranger Item1; Item2 would be split when stored into FLAC m4a tagging could set an Explicit or other rating by mistake m4a tagging would display a title of 'ABC/DEF' as 2 split titles mp3 tagging, better compatibility for ANSI & date with year mp3 tagging, standard compliant behavior that most software does not support is now opt-in mp3 tagging lyrics mapping fixed mp3 tagging 'initial key' implemented new command line -sourceisfloat for coreconverter.exe (also allows multi-encoder to send floating point to an encoder) AIFF tagging fix (could indicate file was corrupted) FLAC tagging bug fix, was writing ';' for comment when had multi-lines FLAC tagging METADATA_BLOCK_PICTURE read as artwork (outside the flac tagging spec.) It's said that SUPER will work with most versions of Windows. I used SUPER in Windows 10 without any issues.
