This medication should be taken after a meal with a big glass of water to decrease irritation of esophagus. Daily dose should be taken as a single dose or divided in two (12 hours between each one). Do not take it in larger amounts or continue to take it after the administered period. Certain brands of this medication cannot be used with dairy products. Do not crush, break, or open a delayed-release capsule, eat the pill whole. If it is an oral suspension shake it before use and measure with special measuring spoon. Never take this drug if it is expired as it may damage your kidney.

Side effects caused by Doxycycline may appear as headache, dizziness, blurred vision, fever, chills, body aches, red skin rash, pale or yellowed skin, dark colored urine, severe pain in upper stomach, loss of appetite, jaundice, easy bruising or bleeding. Contact your doctor if you experience severe effects listed above.
